STATE WATER PROJECT OPERATIONS DATA

For the month of:

**April
2008**

Edmund G. Brown Jr.
Governor
State of California

John Laird
Secretary for Resources
The Resources Agency

Mark Cowin
Director
Department of Water Resources

This monthly report of operational data for the State Water Project has been published since January 1965. Monthly SWP Operations Data Reports from January 1990 have been made available on the Internet at <http://www.water.ca.gov/swp/operationscontrol/projectwide.cfm>. It provides the State Water Service Contractors, public agencies, consultants and others with the daily and monthly status of the Project's water and power operations.

Revisions to these data will appear in the Annual Report of Operations reflecting corrections made after the monthly summaries have been printed.

Printed copies of these reports may be available for a fee.
For details, please contact

State of California
Department of Water Resources

38	Southern Field Division Energy Data	43

MONTHLY HIGHLIGHTS

The following highlights are activities or actions that impacted State Water Project operations during the month of April 2008.

Statewide precipitation was about 85 percent of average for the 2007 - 2008 water-year through April 30. Statewide runoff was 55 percent of average for the water year. Precipitation percentages are used in this report to express historical and regional comparisons. Additional and more specific information is available via the internet at: "http://cdec.water.ca.gov/snow_rain.html".

Snow pack water content overall was about 65 percent of average at the end of April compared to 25 percent at this time in 2007. The pack was 50 percent of the April 1 average, which is the normal date of maximum accumulation.

Snowpack and runoff data are compiled four times a year, for the months of January, February, March, and April, by the California Department of Water Resources in Bulletin 120. The Bulletin also contains forecasts of the volume of seasonal runoff from the state's major watersheds, summaries of precipitation, and reservoir storages in various regions of the State. Runoff through April 2008 was 60 percent of average and the estimated runoff of the eight major rivers of the Sacramento and San Joaquin River regions was 1.9 maf.

Statewide reservoir storage was 85% of average to date. Total storage in major SWP reservoirs at the end of April 2008 was about 3.14 maf, compared with about 4.56 maf at this time in 2007. On April 30, 2008, end-of-month storage at Lake Oroville was about 1.71 maf, as compared to 3.08 maf at this time in 2007. The State share of San Luis Reservoir's end-of-month storage was about 841 taf, as compared with 878 taf at this time in 2007. The combined storage in SWP's southern reservoirs was about 593 taf, compared with about 607 taf at this time in 2007.

SWP water deliveries to date through April 2008 were about 733 taf. This is a combination of project, transfer, and exchange waters. Total deliveries through this same period in 2007 were 1.34 maf.

The Coordinated Operations Agreement (COA) remained in "Excess" conditions through April 9, 2008. On April 10, by mutual agreement, the United States Bureau of Reclamation and the California Department of Water Resources declared "Balanced Conditions" in the Delta in Accordance with Article 6(h) of the COA. These conditions remained throughout the end of the month.

On April 23, a sewage spill was reported in vicinity of Castaic Lake, about 10 miles from the lake's east arm. Elizabeth Lake Creek flow was reduced to 3 cfs and Health Department closed Elizabeth Lake Canyon portion of Castaic Lake to recreation. On April 24, it was found that Elizabeth Creek was not intruded. Sandbags were placed downstream of the waste water facility. The reason for the spill was a malfunctioning pressure switch at the pump station. Bacteria samples were taken immediately and were found to be normal.

1/ Project water delivered from Mojave Siphon in exchange for like amount of natural stream flow.

2/ Transfer of Table A water.

3/ Includes 794 AF of Semitropic Bank Recovery and 1,054 AF of Arvin Edison Water Bank Recovery.

4/ Includes 0 AF to San Gabriel Valley MWD, 2,109 AF to San Bernardino Valley MWD, and 522 AF to San Gorgonio Pass WA.

Clifton Court Cl(mg/l)=200X EC - 25

e = Estimated

N.R. = No Record.

N.C. = Not computed due to insufficient data.

f = Excess Delta conditions with fish concerns.

r = Excess delta conditions with export/inflow ratio concerns.

s = Balanced water conditions with storage withdrawals.

dm = Daily Mean

md = Mean Daily

Table 34. Pesticides, Herbicides, and Other Organic Substances Detected In the SWP

April 2008

Sampling Location	Sample Date 1/	Chemical Detected	Concentration µg/l 2/
North Bay Aqueduct At Barker Slough Pumping Plant	March 19, 2008	2,4-D Diuron	0.10 0.58
California Aqueduct At Banks Pumping Plant	March 19, 2008	2,4-D Diuron Simazine	0.10 0.54 0.04
O'Niell Forebay Outlet Check 13	March 19, 2008	Diuron Simazine	0.29 0.05

1/ Negative values may appear in SWP columns and indicate a mismatch of scheduled CVP energy and actual pumping; adjustments to SWP water shares are made to balance the mismatch.
